**Construction Works in New Terminal Building at
Prishtina International Airport “Adem Jashari”, Limak Kosovo**

Constructions works will be carried out in areas between existing RADAR and DVOR/DME location, in safety distance, approximately 200m - west of TWY Alpha center line. This area is dedicated for new Terminal Building, Air Traffic Control Tower and other associated facilities.

In this area, different working machineries, such as: trucks, pumps, moving cranes, fix cranes etc, will be moving around.

Maximum height of this machinery will be from 20 to 30m and from 40 to 60m radius.

All these works will be carried out in accordance with safety procedures and will not have effects on operation. However airspace users will be simultaneously informed and updated about possible obstacles on the area where the works are taking place.
